

Invitation for Bids

Service Provision of Blood Lead Level (BLL) Measurement around SSR (Society School of Social Reform) School at the Kholabaria area of Labanchora union, Khulna [BD-4834]

Pure Earth Bangladesh, a US-based environmental NGO registered in Bangladesh (Reg. No: 3366), leads evidence-based solutions for lead pollution in low and middle-income countries. Since 2011, we've researched hundreds of consumer products to find sources of lead, assessed 300+ toxic sites, and conducted over 3,000 blood lead level tests for children and pregnant women. Our lead-contaminated site remediation programs achieved a 35% reduction in children's blood lead levels, lowering soil lead concentrations from 20,000 ppm to 55 ppm in many areas; saving the community and future generations from lead exposure. Partnering with government agencies, we launched a Health and Pollution Action Plan and established the Lead-Safe Bangladesh Coalition in 2020, uniting NGOs, INGOs, UN agencies, researchers, and health experts to take impactful actions. Together, we're reducing lead exposure, raising awareness, and safeguarding lives.

Fonds Français Pour L'environnement Mondial (FFEM) supported "**Capacity Building for the Reduction of Lead Contamination in Bangladesh**" project, implemented by Pure Earth in Bangladesh, targets a major global problem, environmental lead pollution, whose public health impacts are particularly alarming in Bangladesh. For this project, Pure Earth Bangladesh requires the services of an organization/Team of Experts to carry out the "**Blood Lead Level (BLL) Measurement Work in SSR School, Labanchora**".

Interested organizations/teams/firms can find the detailed Terms of Reference (ToR) at the following link: [TOR-Labanchora BLL](#)

Details bidding guideline and the instructions for submission can be found at the following link: [Invitation for Bids-Labanchora BLL](#)
